ropean inhabitants of Jamaica, of Cuba, of Hispaniola, etc., have made no pro gress since their establishment there. The mortality among the troops and officers of the English army is greatest among those who have remained longest action of malaria and a high temperature upon the natives of temperate climates, drawn by some of the best medical writers of the age. From the nature of my

experience the following conclusions apear to be valid : 1. That certain parts of our country are characterized by climatic conditions, to which, as a rule, the Northern climate is

incapable of adaption.

2. That acclimation to malaria is premature blanching and loss of the hair, a decrease of mental and physical vigor,

and to some extent a shortening of life.

A philosopher writes: "The girl is generally educated on novels, and her first disappointment comes in on the quiet indifference of the husband after the honeymoon. 'You love me no lon-ger,' said a bride of a few months to her better half in his gown and slippers.
Why do you say that, Puss?' he asked quietly, removing a cigar from his lips. You do not caress me nor call me pet names : you no longer seek so anxiously for my company, was the tearful answer. My dear, continued the aggravating wretch, 'did you ever notice a man run over stones, through mud, regardless of everything till be reaches the car and he seizes hold and swings on. Then he And what does that mean?' An illus tration, my dear. The car is as importpursuit of you, as I would now shoot any one who would come between us, For old upland, I plant 3 feet and 9 but as a proof of my love you insist upon my running after the car. Learn to smoke, my dear, and be a philosopher. The two combined clear the brain, quiet ground, 3 feet 6 inches, or 3 feet 3 inches | them during the inclement winter. the nerves, open the pores, and improve or very rich. In all cases thin to three

Communications upon subjects of general or local interest are solicited.

THE FRENCHMAN AND THE FLEA

upon it. If the slip has been well fitted, there will be no draft in consequence of the displacement of the sash at its lower part, but the top of the lower sash will overlap the bottom of the upper one, and between the bars perpendicular currents of air, not felt, will enter and leave the room.

How To Light a Dark Room.—To light a dark room looking out on a narrow yard or street, let the glass be roughly ground on the outside, and set of firm the entire visible sky, and from the remotest parts of the opposite wall, will be introduced into the apartment, reflected from the immerable faces or facets which the rough grinding has produced. The whole window will appear as if the sky were behind it, and from every point of this luminous surface light will radiate into the room.

THE GRASSHOPPERS.

They Are Again Appearing in Great Numbers—Portious of Minneauta, Kansas and Nebraska Being Again Eaten Up by Them.

Painful reports come to us from many sources concerning the reappearance of the grasshoppers, and the apprehension daily grows stronger that these pests will again destroy the crops in several sections of the West.

The Frazey, who returned last week from a business visit to Southwestern Missouri, reports to the Sioux City Journal that "the young grasshoppers are decembered and the surface of the west.
